

5 Tips for Keeping Your Covered California™ Account Current

Did you buy your Health Net coverage through Covered California? If yes, follow these quick tips to keep your account current. It's the only way to qualify for tax credits – and to make sure you get the right amount of them – for the upcoming year.

1 Set a calendar reminder. It's a good idea to update your Covered California account as changes happen. So set up a reminder to check your account before open enrollment starts in November. October is the perfect time to do it!

2 Go online to update your account. Go to www.CoveredCA.com and log in to your account. Use the same log-in and password you used when you set up your account.

3 Check your profile. Make sure the information in your account profile is still right. Has your mailing address changed? What about your legal name? Your income?

Remember: Your eligibility for tax credits and/or subsidies depends on how much money you make. The amounts may change for 2018. That's why it's important to update your income in your account.

4 Pay your premium. Want to renew your current health plan? We'll take care of that for you! Your premium will change for 2018. The letter we send you in the fall will have your new amount. So will your January 2018 bill that you'll get in December. Choosing a new health plan? Make your first premium payment by December 15. Your new Health Net benefits will begin on January 1, and you'll have no gap in health coverage.

5 Find the answers. We're here for you! Contact your broker with any questions. Or call us directly at **1-877-760-9945**.
