

5 Tips for Keeping Your Covered California™ Account Current

HEALTH NET 101: YOUR HEALTH COVERAGE INFORMATION RESOURCE

Did you buy your Health Net coverage through Covered California? If so, follow these quick tips to keep your account current. It's the only way to qualify for tax credits and/or premium assistance for the upcoming year.

- 1 Set a calendar reminder.** It's a good idea to update your Covered California account as changes happen. So set up a reminder to check your account before 2020 sign up starts on October 15, 2019.

- 2 Go online to update your account.** Go to **www.CoveredCA.com** and log in to your account. Use the same username and password you used when you set up your account.

- 3 Check your profile.** Make sure the information in your account profile is still right. Has your mailing address changed? What about your legal name? Your income?

Remember: Your eligibility for tax credits and/or premium assistance depends on how much money you make. The amounts may change for 2020. That's why it's important to update your income in your account.

- 4 Pay your premium.** Want to renew your current health plan? We'll take care of that renewal for you! Your premium will change for 2020. The letter we send you in the fall will have your new amount. So will your January 2020 bill that you'll get in December. Choosing a new health plan? Make your first premium payment by December 15. That way, your new Health Net benefits will begin on January 1, and you'll have no gap in health coverage.

- 5 We're here for you!** Contact your broker with any questions. Or call us directly at **1-877-760-9945**.
